DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species 1, claims 1, 3, 8, 10, 18, 20, 27, 29, 36, and 38 pertaining to a method including a two step heating of a first and second amorphous silicon layer;

Species 2, claims 2, 9, 19, 28, 37, pertaining to a method including irradiating the first crystalline film with a laser;

Species 3, claims 4, 11, 21, 30, 39, pertaining to a method including moving the metal element into a second amorphous semiconductor film by heating the first crystalline semiconductor film and the second amorphous semiconductor film;

Species 4, claims 5, 12, 22, 31, 40, pertaining to a method including performing gettering by heating the first crystalline semiconductor film and the second amorphous semiconductor film;

Species 5, claims 6, 13, 23, 32, 41 pertaining to a method including forming a barrier film over the first crystalline semiconductor film;

Species 6, claims 14, 24, 33, 42, pertaining to a method including wherein the second amorphous semiconductor film is formed by sputtering in a state in which a flammable gas and a noble gas are supplied to a film formation chamber;

Species 7, claims 16, 25, 34, 43, pertaining to a method wherein the second amorphous semiconductor film is formed by sputtering in a state in which a filament including Ti that is disposed in a film formation chamber is heated;

Art Unit: 2813

Species 8, claims 17, 26, 35, 44, pertaining to a method including wherein the second amorphous semiconductor film is formed by sputtering in a state in which a voltage is applied between electrodes including Ti disposed in a film formation chamber to generate a plasma;

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the

Art Unit: 2813

prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
